

Post Event Summary Report

Event	Hacktoberfest 2023
Speakers	Shivam Shandilya
Date	Thursday, September 28
Venue	E3-216
Timings	2:15 PM

Introduction to Hacktoberfest:

- The Hacktoberfest 2023 event was a highly anticipated annual celebration of open-source software and community contributions.
- It aimed to encourage and reward individuals for their contributions to various open-source projects.

Structure of Hacktoberfest:

- Hacktoberfest 2023 featured a month-long period in October for participants to make contributions to open-source projects.
- The event emphasized the importance of quality contributions rather than quantity.
- Participants were required to make at least 4 valid pull requests on GitHub to be eligible for Hacktoberfest rewards.

How to Register:

- To participate, attendees could simply visit the Hacktoberfest website and sign up for the event.
- After registration, participants could start making contributions to open-source projects and track their progress via the website.

ALiAS Projects and Hacktoberfest:

- All projects under ALiAS were labeled as Hacktoberfest-eligible.
- Contributions made to these projects counted as valid Hacktoberfest contributions.
- This encouraged participants to engage with ALiAS projects while contributing to the wider open-source community.

In summary, Hacktoberfest 2023 was a month-long celebration of open source, offering a structured opportunity for tech enthusiasts to contribute, earn rewards, and engage with ALiAS projects as part of this global event.
